

TOTSCo Bulletin No.61

Date: 7 June 2024

Subject: Publication of the TOTSCo path to One Touch Switch go-live v2

TOTSCo is pleased to publish the updated TOTSCo path to One Touch Switch go-live v2.

The purpose of this document is to guide you through the necessary steps you need to take with us on your journey to OTS go-live. To make things easier for you, we have published both a [clean version](#) and a [marked-up](#) version so you can easily see where we have added information.

The key updates in this version include:

- Enhanced integration-test exit criteria
- Additional details on production implementation testing (PIT)
- Timescales to join or complete activities

Call to action

Contact us before mid-July to book your production implementation test (PIT). If you leave it until later, we cannot guarantee that your test slot will be before OTS go-live. Also, remember that you need to complete and sign off on your integration testing before your PIT slot, so please don't delay.

If you are using a Full Management Managed Access Provider (MAP) your Map will organise your PIT test for you.

Please do not hesitate to visit [our website](#) or to [contact us](#) directly should you need more information or support.
