# Top 3 challenges

---

## **The scenario's**

1. CP isn't responding to an OTS message.
2. I have received a message that I do not believe is correct.
3. A CP is not on the CP-to-CP tool, how do I contact the CP.

## **The solution**

Try contacting the CP through the CP-to-CP tool, if they are not registered to use, try and contact the CP through other channels.

Additionally, we are currently exploring ways to support the industry, as you settle into the new ways of working.

# Action Update

# Action Update

**7/6: SU/JW** – To see if there is a way of giving figures for the number of CPs who are using a MAP solution and CPs who connect directly. **Ongoing**, there has been a lot of change in CP Hub connection choices in the leadup to 12th September Golive. TOTSCo to reconsider this request when things have settled down.

**1/7: SU/JW** - to bring an explanation to the next forum on what components are included in the Hub availability measure. Does it reflect the CP experience? **Ongoing** - JW suggested that enhancements to existing measures should be considered as part of the Forum Review (see agenda item 5).

**3/7: Forum Members** - to document the question on how Switching Implications SLA should be measured and send to chairs of both OTS Operations Forum and Industry Process Group. **Ongoing**- No response as yet. Will keep open until next Forum then close this action.

**1/9: TOTSCo** – When showing Ticket numbers at the next forum, to split out those that not for TOTSCo to resolve.

**5/9:** There was no action 5/9 !

**6/9: Forum Members** to email their concerns about TOTSCo test environment capability to JW and RW.
